Projects:

Having 6 months of experience as Python Developer Intern (ENut Technologies Pvt Ltd) Enhances organization reputation by accepting ownership for accomplishing new and different requests, exploring opportunities to add value to job accomplishments.

☞ **Project:** Employee Management System **(Backend)**

Technologies: Python, DJango, MySQL, HTML,CSS.

Overview: An employee management system helps your employees to give their best efforts every day to achieve the goals of your organization. It guides and manages employees' efforts in the right direction. It also securely stores and manages personal and other work-related details for your employees. That makes it easier to store and access the data when there is a need.

Role: Backend Developer (support role)

Responsibilities:

1. Templates creation as per requirement with the help of DJango framework
2. Employee Forms creation by using model forms.
3. Employee Dashboard (CRUD operation).
4. Employee Login panel (User authentication).
5. Navigation (Menu) creation with the help of Template Inheritance
6. Bugs Fixing & Support.

☞ **Project:** Hyderabad It Trainings **(Front-end)**

Technologies: HTML,CSS,Javascript,Bootstrap&Reactjs
